

AUTO FEED SCREW DRIVERS  
AND COLLATED FASTENERS

## The *Ejector* Screw All Tropical Hardwood Installations

### NO PRE-DRILLING or PRE-COUNTERSINKING

The screw tip acts like a drill bit, bores a pilot hole as it threads itself into the wood and the cutting nibs under the screw head carve away material to get a clean finish. As well, the Muro tool has a hard stop depth setting so the screws are driven to the same depth...each and every time, no more feathering the trigger or over driving screws.

### A QUICKER, CLEANER JOB

with no more aches and pains.

**Muro's Exotic Hardwood Screws** have been specifically designed to greatly simplify any projects using Tropical Hardwood materials. Screwing down deck boards for docks, decks and boardwalks has never been easier. The unique head and screw tip design turns back-breaking work into an effortless one-step operation, all performed while standing up!

Muro Exotic Hardwood Screws come in various sizes from 1-1/2" to 4" and in coils of 150 or strips of 30.

### Customer Support That Counts

When you work with our tools you are backed not only by the industry standard for power, speed and quality but you have access to our extensive line of fasteners and our knowledgeable customer service staff. Pick up the phone or send an email anytime with questions about the right tools or fasteners for your job and we'll get you on the right track. Our priority is ensuring that your job gets done right.

The unique drill tip bores a pilot hole while threading itself into the wood ejecting sawdust in the process
